PREFATORY NOTE

This index undertakes to deal only with the printed reports of administrative officers, legislative committees, and special commissions of the states and with governors' messages for the period since 1789. It does not refer to constitutions, laws, legislative proceedings or court decisions, except in so far as they happen to be found in the class of documents above mentioned. It attempts, on the other hand, to furnish a list, as complete as possible, of all the documents and messages which fall within its scope, in whatever form they may have been published, whether separately, in collected documents, legislative journals or volumes of laws, and to indicate the volume in which they may be found. Unless otherwise indicated the material indexed is in the New York Public Library. In some cases reference is made to reports and messages prior to 1789, and to publications other than public documents which it was felt would be helpful to those likely to use the index, but no claim to completeness is made except in the case of the documents and messages since 1789. In addition to furnishing a list of reports and messages, the index undertakes to supply a reference by volume and page to all material of economic importance which they contain, with the exception of that contained in the reports of bureaus of labor. The reason for this exception is that these reports have already been indexed by Carroll D. Wright, late United States Commissioner of Labor,[1] in a volume published by the Department of Labor in 1902. Although the index is confined to matter of economic bearing, the term " economic " has been given a broad interpretation. In view of this liberal interpretation it is believed that the index will constitute a useful addition to the resources of students of almost any aspect of American history.

It will be seen that the present index differs both in scope and character from R. R. Bowker's " State Publications," the valuable pioneer work in this field. It is narrower in scope than " State Publications " which aims to present a list not only of reports and governors' messages but of all state documents; but in the field which the present work covers it contains not only a more complete list of documents than has hitherto been published but also an index of their contents in so far as these have an economic bearing.

Each volume is divided into two parts. Part I contains references to general sources of information and descriptive matter found in the documents. Part II contains references to particular series of reports, and particular topics, arranged alphabetically by topics. The references under each topic are divided into two groups, viz., " serial " and " non-serial." Within each of these divisions the arrangement is chronological.

[1] Index of all reports issued by bureaus of labor statistics in the U. S. prior to Mch. 1, 1902. Wash., 1902. 287 pp. 8°.

Anyone desiring information on any particular topic will, therefore, look for that topic in its alphabetical order in Part II. Numerous cross-references will, it is hoped, make it possible to discover with little difficulty all the material bearing on that topic.

Uniform entry words for subjects recurring in different states will be retained throughout the series. It will thus be possible to make a study not only of the historical development of an economic subject as reflected in the documents of an individual state but also to make a comparative study of that development as it has taken place in the country at large. To accomplish this purpose it has been necessary to make the selection of entry words without reference to the peculiarities of local usage, such peculiarities being recognized in the case of each state by cross-references. Unless otherwise stated the size of the books is octavo.

The present volume is confined to the economic material contained in the printed reports of administrative officers, legislative committees and special commissions of the State of New Hampshire and in the messages of the governors of that state. This volume has been preceded by a similar volume devoted to the State of Maine and will be followed by volumes devoted to other states. The work when completed, will therefore, furnish an index to the economic material in the reports and governors' messages of all the states of the Union.

Bank Commissioners

Pursuant to secs. 22 and 23, Rev. Statutes.

The first act relating to bank comrs. was passed July 5, 1837. It provided for the apptmt. of three comrs. for a term of one yr. each. The work of the comrs. related to discount banks. No serial repts. were issued. It was not until July, 1841, that the comrs. were given charge of the savings banks of the state. The first ann. rept., made in 1844, was preceded by several special repts.; see below under "non-serial" group.

From 1844 to 1864 the names of the comrs. are given in connection with banks examined. From 1844 to 1862 the returns are grouped under examiners. From 1862 to 1864 the grouping is discarded, but the name of the examiner is retained under each bank examined. In 1864 the date of examination only is given, and is abandoned thereafter. Beginning in 1861 the date of incorporation of each bank is given, and with 1865 the date of expiration of the charter. In 1859 the first recapitulation of aggregate returns was made.

For note on early N. H. bank comrs.' repts. see Knox. Hist. of Banking, p. 351.

In compliance with a resolution adopted in the U. S. House of Representatives on July 10, 1832, the Secy. of the Treas. laid before the next and each succeeding session of Congress, until 1863, such stmts., or returns, showing the capital, circulation, discounts, specie, deposits, etc., of the different banks and banking cos. as were submitted to the respective legislatures and governors of the several states within the yr. Where these stmts. could not be obtained, such other information as would best supply the deficiency was required by the resolution to be presented. Such ann. repts. as were presented to and printed by the U. S. in consequence of the above resolution, have been added to the entries for the ann. repts. printed by the state. In addition there were printed in the federal docs. under this resolution certain of the repts. of the committee on banks, of which a collation follows that in the state repts. above. Extracts from governors' messages and special repts. of banks published in the federal docs. have been entered under their several dates under the "non-serial" group below.

Before 1841 this rept. was in the form of a stmt. made by the warden; after that date it is an ann. rept. of the officers of the prison. Repts. for 1891-1894 are marked on t. p. v. 1, pt. 2-5, and are paged consecutively. From about 1838 each ann. rept. contains in tabular form, beginning with yr. of establishment of state prison in 1812, a stmt. of the no. of convictions, discharges, pardons, etc.
*Contains copy of contract entered into by warden on one part for hiring out of convicts as laborers.
According to Sabin, no. 52,924, the rept. for 1835 would appear the first one to have been separately printed.
